RESPIRATORY PROTECTION

Purpose

In the Respiratory Protection program, hazard assessment and selection of proper respiratory PPE is conducted in the same manner as for other types of PPE. In the control of those occupational diseases caused by breathing air contaminated with harmful dusts, fogs, fumes, mists, gases, smokes, sprays, or vapors, the primary objective at St. Tracy's School is to prevent atmospheric contamination. This shall be accomplished as far as feasible by accepted engineering control measures (for example, enclosure or confinement of the operation, general and local ventilation, and substitution of less toxic materials). When effective engineering controls are not feasible, or while they are being instituted, appropriate respirators shall be used. References: OSHA Standards Respiratory Protection (29 CFR 1910.134)

Responsibilities

All Employees shall follow the requirements of the Respiratory Protection Program.

Management

- ◆ Implement the requirements of this program
- ◆ Provide a selection of respirators as required
- ◆ Enforce all provisions of this program
- ◆ Appoint a Specific Designated individual to conduct the respiratory protection program

Program Administrator
